

Contents

1. Introduction	7
2. Large Hadron Collider, Compact Muon Solenoid, and its forward detectors	10
2.1. Large Hadron Collider	10
2.1.1. Large Hadron Collider in Run1	11
2.2. Compact Muon Solenoid	12
2.2.1. Barrel and endcaps detectors	14
2.2.2. Hadronic Forward calorimeter	17
2.2.3. CASTOR calorimeter	20
2.2.4. Other forward detectors	22
2.2.5. Trigger	24
2.2.6. Software and computing	26
3. Underlying event	28
3.1. Underlying event description	28
3.2. Multiple parton interactions	30
3.2.1. Multiple parton interactions in PYTHIA	31
3.2.2. Multiple parton interactions in HERWIG++	34
3.3. Energy flow in Hadronic Forward calorimeter	36
3.4. Energy flow in CASTOR calorimeter	45
3.5. Charged tracks multiplicity in events with a high- p_T leading object	51
4. Forward jets	55
4.1. QCD evolution	55
4.1.1. DGLAP evolution equations	55
4.1.2. BFKL evolution equations	56
4.1.3. CCFM evolution equations	57
4.2. Jets in QCD	58
4.3. Jet finding algorithms	59
4.3.1. The cone algorithms	60
4.3.2. The sequential recombination algorithms	61
4.4. Jet energy corrections	62
4.5. Inclusive forward jets	64
4.6. Forward–central jets	72
4.7. Dijet K-factor	74
4.8. Mueller–Navelet jets	79

5. Soft and hard diffraction	87
5.1. Diffractive interactions	87
5.1.1. Soft diffraction	89
5.1.2. Hard diffraction	91
5.2. Soft diffractive processes in pp collisions at 7 TeV measured with the CMS detector	93
5.2.1. Topologies of diffractive events in detector	94
5.2.2. Forward and central large rapidity gaps cross sections	97
5.2.3. Single diffractive and double diffractive dissociation cross sections	99
5.2.4. Pseudorapidity gap cross section	102
5.3. Hard diffractive processes in pp collisions at 7 TeV measured with the CMS experiment	102
5.3.1. Hard diffractive dijet production	102
5.3.2. Hard diffractive W and Z bosons production	108
5.3.3. Jet-gap-jet production	112
6. Exclusive production	117
6.1. Central exclusive production mechanisms	117
6.1.1. Pomeron–pomeron interactions	117
6.1.2. Photon–photon interactions	118
6.1.3. Pomeron–photon interactions	120
6.2. Central exclusive production Run1 results from CMS	120
6.2.1. Measurement of the exclusive $\gamma\gamma \rightarrow \mu^+\mu^-$ production	120
6.2.2. Measurement of the exclusive $\gamma\gamma \rightarrow e^+e^-$ production	123
6.2.3. Search for the exclusive $gg \rightarrow \gamma\gamma$ production	127
6.2.4. Exclusive $\gamma\gamma \rightarrow W^+W^-$ production and constraints on anomalous quartic gauge couplings	130
6.2.5. Exclusive $\pi^+\pi^-$ production	136
7. Summary	140
Bibliography	143
